S.No	Tasks
1	Data Format Conversion csv to json,json to csv,csv to xml,xml to json
2	**Database Connector** - Performing CRUD Operations
3	**MongoDB Connector** - Performing CRUD Operations on MongoDB database
4	**GoogleSheet Connector** - Inserting data into GoogleSheet
5	If a new Case record is created then only that newly created record should be inserted int
6	**JMS Connector** - Publishing data into ActiveMQ
7	Consuming data from ActiveMQ
8	**Custom Connector** - Calculator and Concatination Custom Connector
9	**Kafka Connector** -Publishing and Consuming the data using Kafka
10	**Zuora Connector** - Create a record in Account object of Zuora from Postman.
11	Retrieving the Account details along with associated Contact details and creating a Zuora
12	If a new Account record is created in salesforce then only that Accounts are created in Zu
13	If a new Account record is created in salesforce then only that Accounts are created in Zu
14	Listening Data from Salesforce and creating Account in Zuora
15	**lookup()** - Calling Sub flows from dataweave – lookup().
16	Accessing data from HR App using lookup()
17	Adding **Child Error** to MuleAppInsights.
18	**Scatter – Gather** Component
19	**API Manger and policies** in AnyPoint Platform
	1 Basic Authentication - Simple
	2 Client ID Enforcement
	3 Rate Limiting
	4 Rate Limiting – SLA Based
	5 IP Blocklist
	6 JSON Threat Protection
20	**MuleApp Insights Custom Connector** - Audit Log,Error Log
21	Created MuleAppInsights Flows in Salesforce
	1 AppInsightStage Flow
	2 Application Handler
	3 Flow Handler
	4 Audit Header Handler
	5 Error Handler
22	Sending data from ActiveMQ to MuleAppInsightStage Object in Salesforce
23	Creating Reports and Dashboards for MuleAppInsights
24	Publishing and Consuming data from Kafka
	1 Using UriParams to select target
	2 Using Id to get target details from database
	3 Using Id to get source and target details from database
25	**Crypto Connecto**r - Pgp encrypt, Pgp decrypt
	1 Converting Plain text to Cipher text using Pgp encrypt connector
	2 Converting Cipher text to Plain text using Pgp decrypt connector
26	Salesforce Case- Salesforce Account
27	Salesforce Case- Salesforce Case
28	**Amazon S3 Connector** - Uploading Files to S3 Bucket
29	Handling errors in the mule flow
	1 **On Error Continue**
	2 **On Error Propagate**
30	Created Flow Chart for MFT
31	Created MFT mule application.It contain the following flows

1 Getting_live_jobs
                    2 Conversions
                    3 Decryption and Encryption Flow
                    4 sources
                    5 target
                    6 scheduler
32   Sending mail using **Email Connector**
33   **File Connector** - performing read and write operations on files.
34   **FTP Connector** - performing read and write operations on files using FileZilla
35   **Salesforce Connector**
                    1 Fetching data of an Object using Query Component
                    2 Updating data in an Object using Update Component
                    3 Creating a record using create Component
                    4 Deleting a record using delete Component
36   Created RAML code in AnyPoint Platform for performing CRUD Operations on Salesforce
37   Building a Q&A system on own CSV data using ChatGPT
38   Utilizing ChatGPT on CSV file - created main.py and apicall.py
39   Building a Q&A system on data present in MYSQL database using ChatGPT
40   Created an Ngrok Tunnel for Exposing a FastAPI Application

:o the Google sheet.

 Account.
ora.(without Zuora query component)
